- Our English to Hindi translation tool is powered by the Google Translation API. To use it, simply type in the left-hand text area and click on the "Translate" button. Our app will then translate your English word, phrase, or sentence into Hindi. The translation takes just a few seconds and supports up to 1500 characters per request. Although the translation may not be 100% accurate, it provides a basic idea, and with a few modifications, it can be quite accurate. This translation software is evolving day by day, and Google engineers are continuously working on it to make Hindi translations more accurate and intelligent. Hopefully, it will one day produce near-perfect translations! Hindi is widely spoken, with more than 691 million (69.1 Crore) speakers worldwide. For those who cannot speak Hindi, translating from Hindi to English can be challenging. Many websites offer translation services for a fee. While its a good idea to pay for translating large amounts of text, such as books or articles, or for professional purposes, theres no need to pay for commonly used phrases, greetings, or for other informal uses. For these purposes, our tool can be quite helpful.You can copy the translated text and share it on social media platforms such as Facebook or Twitter, or email it to friends or family.If you have any suggestions or come across a particularly amusing translation, please share it with us on our Facebook page. And finally, dont forget to give us a like and share our page with your loved ones on Facebook. Frequently Asked Questions (FAQ) Our translation service is based upon neural machine translation technology and we believe our language data is one of the largest in the world. As a result, the translation output is of very good quality in most cases. Whenever you enter a word, phrase, sentence or paragraph in English - the browser or the mobile app sends an API request to our cloud translation server. The server returns a response with the translated Hindi text. The server automatically translates the English text, and for proper nouns, or entity names, it tries to provide the same in Hindi (Devanagari) script. In rare cases, when a sentence is too long, the translator might provide a output that feels like a summary of the input sentence. Our system is a combination of machine learning, specifically, deep learning, big data, natural language processing, web APIs, cloud computing etc. to perform higher quality translations. Can we download this translation service? At present, the translation service is only available online. However, if you download the SHABDKOSH Indian Language Dictionary and Translation App, you can perform translation offline or online. Is the English to Hindi translation FREE? Yes. This English to Hindi text translation facility is absolutely FREE. You can use our translation tool for both personal and commercial use. However, we have the following restrictions:* Per Request Limit: We impose a limit on the amount of text translated per request. However, there is no restriction on the number of requests you can send, within a reasonable extent. * Daily Limit: While you can make a number of requests for translation, you wont be able to translate if you make excessive and unreasonable number of requests. These restrictions are placed to ensure that robots or automated software are not abusing this facilities. Yes, we provide extensive Linguistic APIs for use by developers and other products / services. Some of these include bilingual dictionary APIs, translation APIs, OCR API, Rhyme API, spell check APIs and these are supported across English and 12 Indian languages. We also provide standalone servers that are dedicated to your application so that you can be assured of the data privacy and confidentiality. something that you may not get from the global mega corporations. If you would like to know more, please get in touch via email. What languages are supported by the translator We support translation between English and 12 Indian languages - Assamese, Bengali (Bangla), Gujarati, Hindi, Kannada, Malayalam, Marathi, Oriya (Odia), Punjabi, Tamil, Telugu, and Urdu. The links to each of the translators are given below. English, now one of the most spoken languages globally, has a rich and fascinating history. Old English was a complex language with a rich vocabulary and intricate grammar. It was influenced by the latin spoken by Roman missionaries and scholars. In 1066, the Norman Conquest marked a significant turning point in the history of English. The 17th and 18th centuries were the times of expansion for the English language. As the British Empire grew, the influence of English spread to various parts of the world. This included North America, Caribbean, Africa, India, and Australia. This global expansion brought English in contact with numerous other languages, thus, leading to emergence of new words and phrases. Today, English is spoken by over a billion people worldwide, either as a first language or second. It also serves as a primary or secondary language in many countries.
